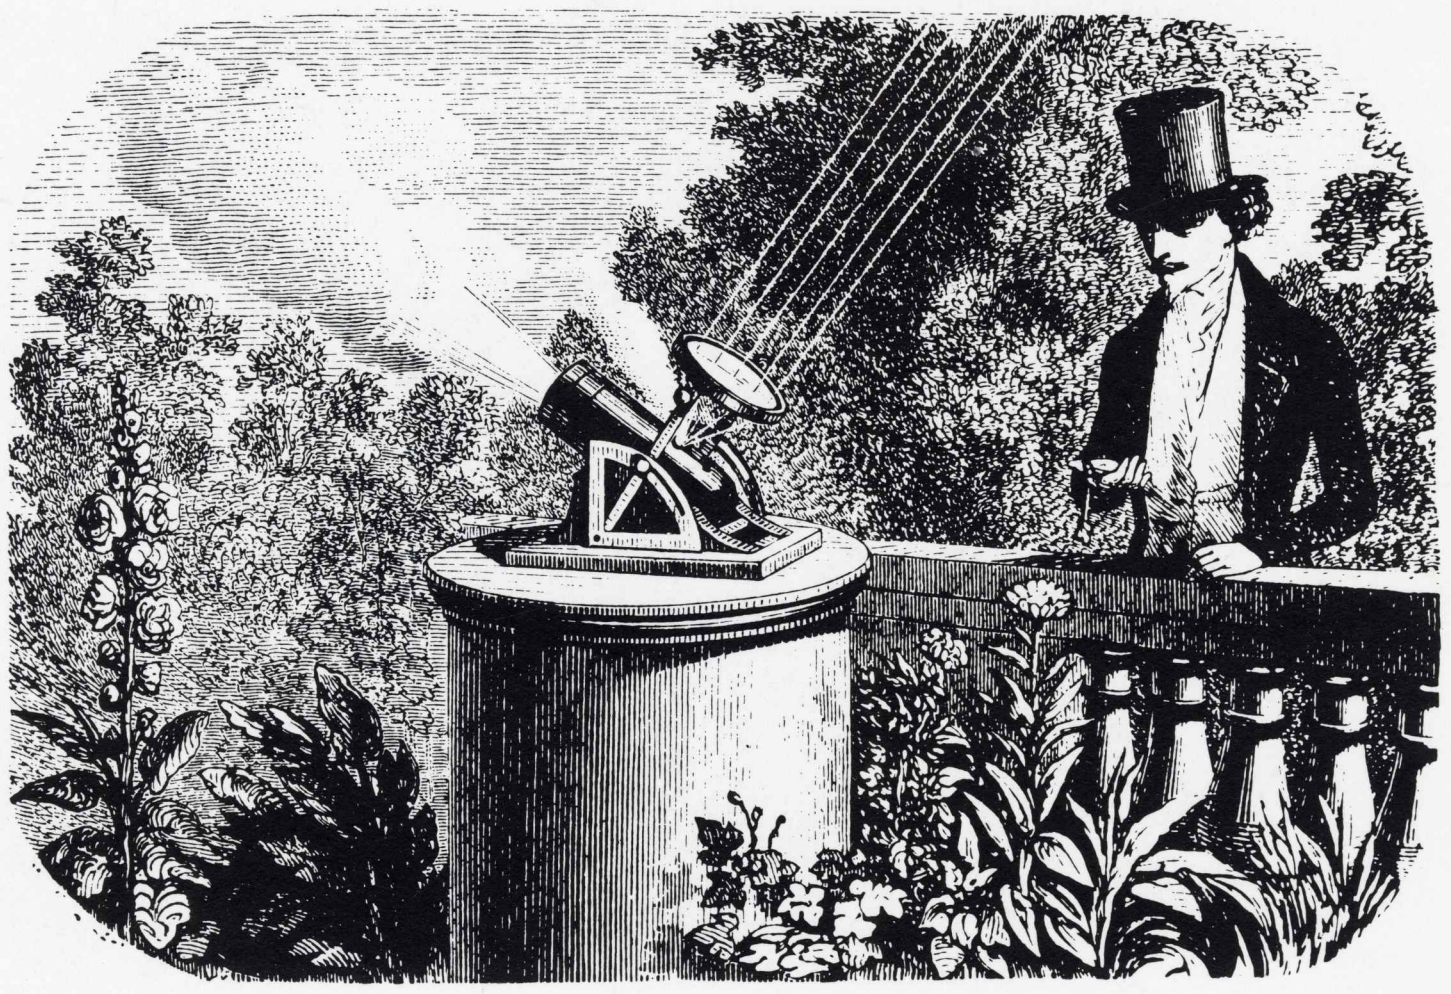
THE SCIENCE COLLEGE

A NEW STYLE IN SCIENCE EDUCATION



If you have made up your mind that you want to study science

If you think an education consists in using your mind and not just in accumulating more facts

If you want to learn by doing research and not only by hearing about it

If you take pleasure in thinking and enjoy an intellectual challenge

COME AND VISIT THE SCIENCE COLLEGE

IT MAY BE FOR YOU

The Science College provides a new way to earn a B.Sc. degree. It combines specialization in a discipline of your choice with an opportunity to think about, talk about and engage in scientific activity.

When you are a member of the Science College, two-thirds of your courses will be in the department of Science that you choose and one-third will be with us.

College courses will be concerned with the nature and intellectual basis of scientific thought, the interrelation between different branches of science and with independent research. From their first year, students will have the opportunity to become apprentices in various research laboratories within the University.

If you would like to know more about the College, telephone us at 879-4160 and ask to have information sent to you - or visit us on the 12th floor of the Hall Building, room 1260, de Maisonneuve and Bishop.
